ICT probe pin are short for in-circuit testprobe pins,also called single ended probe pin.The probe pin is consisted of aspring,a barrel and a plunger.The probe pin is plated with gold over

nickel.

ICT probe pins are mainly used for testing the electrical performance of in-circuit components on PCB and the connection between circuit networks. It could measure components such as resistors, capacitors, crystal oscillators, and perform functional tests of optocouplers, transformers, operational amplifiers, power supply modules and integrated circuits
