

Product Specification

Pogo PIN is a spring-like probe formed by the three basic parts of needle shaft, spring and needle tube after riveting and prepressing with precision instruments. The surface coating of POgo Pin is generally gold-plated, which can better improve its anti-corrosion function, mechanical properties, electrical properties, etc. The tip has a sharp needle, grasp needle, round head needle, knife needle and so on. Pogo Pins are commonly used for precision connections in mobile phones, telecommunications, automotive, medical, aerospace and other electronic products to improve the corrosion resistance, stability, and durability of these connectors.

Production Flow

Company Profile

Suzhou Shengyifurui Electronic Technology Co.,Ltd is the leading test probe manufacturer in China. In 1984 we set up the first factory in Cixi City, Zhejiang Province. With high quality and sweet service, our products are widely used in more than 50 countries in the world. We are dedicate to being the most reliable test probe supplier in China Market.We are committed to provide the most professional products and services to the customers in the world. Products include in-circuit spring test probe, semiconductor spring test probe, battery charging pogo pin and the related accessories.
